Introduction to Data Mining

Lab 7: Programming 2

Program a Naïve Bayes classifier and test with Weka

Input: A dataset in ARFF format

Hint: refer to classes weka.core.Instance, .Instances, .Attribute, and weka.classifiers.bayes.NaïveBayes

```
NaiveBayes
------------------------------

        1
        |
        *
Instances            *   Instance
------------             ------------------------------
Instances(...)
getData(...)
                             1
                             |
                             *
                         Attribute
                         ------------------------------
```
